EXPERIENCE

Analyst Developer | FNZ

Feb 2026 – Present

Gurugram

- Core developer in the Lloyds Banking Group (LBG) team.
- Resolving and debugging complex SQL queries and codebase in C#.

Software Engineer | Indus Valley Partners

Associate Software Engineer

July 2023 – Jan 2026

Noida

- Received **Spot Award** for Technical Excellence.
- Core team member of the EDM and Data Quality (DQM) team. Owned multiple blocks, including SFTP, Mapper, Modeler, Cache Reader, Cache Writer, API block, and several modules like Multi Dataset, Exception Dashboard, and Data Dictionary.
- Enhanced the API block by developing **polling** and workflow features to poll services until user-specified conditions are met using **Polly** NuGet.
- Operated in a DevOps environment utilizing **Podman**, **Docker images** - **containers**, **RAD modules**, and **Kubernetes**.
- Efficiently handled on-call issues, ensuring minimal downtime.
- Conducted multiple **self-POCs** on how micro-frontends work, integration of multiple small apps, and navigation within nested micro-frontends.
- Explored new technologies, including **Backend for Frontends**, **SQL Profiler** for debugging, **Migration Utility**, **Dacpac**, **MicroFrontends**, Microservice architecture, xUnit, and RTL for unit testing of components.
- Engineered an AI-driven chatbot leveraging **MCP servers** and agents to orchestrate **LLM-based** pipeline generation and tool execution.
- Added Excel Upload/Download configuration support in Modeler to enhance UX.
- Developed a **multi-dataset** query builder with drag-and-drop support to visually create and execute SQL queries (SELECT, JOIN, WHERE, etc.) through an interactive canvas interface.
- Delivered complex and responsive React screens within tight deadlines.
- Wrote optimized SQL queries, **recursive CTEs** and stored procedures.
- Created C# APIs for maintaining audit trails and versioning.

Frontend Engineering Intern | HackerEarth

March 2022 – May 2022

Remote

- Integrated APIs and Designed React components using Figma.
- Gained practical experience with AWS EC2, Storybook, Jira, Bitbucket, Ubuntu, Git, and JavaScript debugging.

PROJECTS

Social Media & Video Chat MERN App

React | MongoDB | Sanity | Express | JWT | Redux | Socket | WebRTC

- Built a responsive networking app with posts, images, and audio-video connectivity using sockets; implemented **JWT** and email-based OTP for security, and optimized performance via MongoDB query improvements, Sanity image CDN integration, and lazy loading.

EDUCATION

B.Tech in Information Technology

USICT, GGSIPU

2019 – 2023

Delhi, India

- Scored 8.99 CGPA
- 12th: 92.4% and 10th: 10 CGPA

SKILLS

Languages

JavaScript, C/C++, C#, HTML, CSS

Frameworks/Libraries

React, DotNet, React Testing Library, xUnit, SASS, Redux Toolkit, Node/Express, jQuery, Material UI, Bootstrap, Next.js

Databases

SQL Server, MySQL, MongoDB, Sanity (CMS), Cloudinary

Devops Tools

Podman, Docker, Kubernetes, Git, SVN, Azure Devops, GitHub, Jira, AWS (S3, EC2, IAM)

Others

Data Structures and Algorithms, Firebase, Postman

CODING PROFILES

Codeforces

Expert (Maximum Rating: 1694)

CodeChef

5 stars (Maximum Rating: 2122)

Leetcode

Knight (Maximum Rating: 1998)

Google Hash Code 2021

AIR: 26 Global Rank: 216

Facebook HackerCup 2021

AIR: 77 Global Rank: 499 Top 3.9 %

Google Code Jam 2021

AIR: 209 Top 3.9 % Qualified for Round 2

Google KickStart 2022

AIR: 250 Global Rank: 357 Top 2.9 %

ACM ICPC Regional 2020

AIR: 295
